Installment System

Jan Ghani app - poora process, step by step

Ek nazar mein
Installment officer customer add karta hai, calculator se plan banata hai aur qiston ki payment record karta hai.
Plan banate hi qiston ka poora schedule database mein ban jata hai (6, 10, 12, 18 ya 24 mahine).
Customer app mein sign up karke officer ka QR scan karta hai, aur uska account us customer se connect ho jata hai.
Phir customer apna Home, Schedule aur Payment History khud dekh sakta hai.

1. Kaun kya karta hai (roles)

Role	Kya kar sakta hai	Kya nahi dekhta
Installment Officer (installment_officer)	Installments tab: customer add, calculator, plan banana, payment record, QR dikhana.	Branch, Warehouse, Dashboard, Investment.
Owner (owner)	Har cheez, aur Installments tab bhi (officer jaisa poora access). Owner ko apni koi id nahi chahiye.	-
Customer (customer)	Sirf apna portal: Home, Schedule, History (aur agar branch ka customer bhi ho to Invoices).	Doosre customers ka data, sidebar ki reports.
Accountant (accountant)	Sirf Branch aur Warehouse ki reports.	Installments tab (iska access nahi).

2. Poora process (shuru se aakhir tak)

Step 1 - Officer ka account

- Officer pehle app mein sign up karta hai (email + password) aur email confirm karta hai.
- Owner/admin database mein us ke **users** row ka role **installment_officer** kar deta hai (customer_token **null** likhna zaroori hai).
- Officer login kare to use sirf **Installments** tab milta hai.

Step 2 - Naya customer add karna

- Installments screen par upar person-add icon dabao.
- Naam (zaroori), phone, CNIC aur address bharo, **Save** dabao.
- Customer **installment_customer** table mein save hota hai. Uska **amount 0** hota hai (abhi koi plan nahi).
- Save ke baad app poochti hai: *Create plan now?* - Create plan dabane par calculator seedha us customer ke saath khulta hai.

Step 3 - Calculator se plan banana

- Calculator icon (ya customer detail mein **New Plan**) dabao.
- **Customer** select karo (search ke saath), **Product ka naam** likho, **Price** aur **Advance** likho.
- Advance khud 15% bhar jata hai. Isse kam allow nahi. Advance price se kam hona chahiye.
- **Plan length** chuno: 6, 10, 12, 18 ya 24 mahine. Har option par mahana qist saath dikhti hai.
- Neeche poora hisaab dikhta hai (price, advance, baqi raqam, charge, total, mahana qist, aakhri qist) aur schedule preview.
- **Start date** badal sakte ho (default aaj). Pehli qist start date se 1 mahine baad hoti hai.
- **Create plan** dabao.

Step 4 - Plan save hone par kya hota hai

- Ek hi transaction mein: **plan**, qiston ka **schedule** aur **advance ki payment** save hoti hain.
- Customer ka **amount** barh kar plan ke **total payable** jitna ho jata hai (advance shamil nahi, wo pehle hi ada ho chuka).
- Ek customer ke kai products ke plans ho sakte hain (multi-plan).

Step 5 - Qist ki payment record karna

- Customer detail mein plan kholo, phir **Record Payment** dabao.
- Unpaid qist chuno (default agli qist), raqam likho (poori ya **partial**), chaho to note likho, **Save**.
- Raqam us qist ke baqi hissay se zyada nahi ho sakti.
- Qist poori ho jaye to wo **Paid** ho jati hai, customer ka **amount** ghat jata hai, aur payment history mein entry aa jati hai.
- Saari qisten ada hon to plan **Completed** ho jata hai.

Step 6 - Customer ka account connect (QR)

- Officer customer detail mein **QR icon** dabata hai. QR mein **inst:<customer id>** hota hai.
- Customer app mein sign up karta hai. Pehle uska role khali hota hai, isliye use 'Visit your nearest branch' screen aati hai.
- Customer wahan **Scan QR** dabata hai aur officer ka QR scan karta hai.
- Database function **connect_installment_account** us ke users row mein **role = customer** aur **installment_id = customer id** set kar deta hai.
- Ek installment customer sirf ek hi account se connect ho sakta hai.

Step 7 - Customer apna data dekhta hai

- **Home:** baqi raqam, kitna ada hua, agli qist (raqam, date, kitne din baqi), aur apni cheez ki tafseel.
- **Schedule:** har qist ki date, raqam aur status (Paid / Next / Overdue / Upcoming).
- **History:** advance aur har qist ki payment, kul ada ki hui raqam, aur 'Next payment' ka note.
- Agar customer ke paas abhi koi plan nahi, to teeno tabs par 'No installment plan yet' dikhta hai.

3. Calculator ka hisaab (website wala formula)

Officer ka calculator aur website ka calculator ek hi formula use karte hain, isliye customer ko dono jagah same raqam milti hai.

- **Baqi raqam (financed)** = Price - Advance
- **Charge** = 2.5% har mahine ka. Yani total charge = 2.5% x mahine.
- **Total installment** = Baqi raqam x (1 + 0.025 x mahine)
- **Mahana qist** = Total / mahine, **50 ke nazdeeki multiple** mein round.
- **Aakhri qist** = Total - (mahana qist x (mahine - 1)), taake jod bilkul poora aaye.
- **Kam az kam advance** = Price ka 15% (upar ki taraf round).

Plan	Kul charge	Plan	Kul charge
6 mahine	15%	18 mahine	45%
10 mahine	25%	24 mahine	60%
12 mahine	30%		

Misal: Samsung TV, Price Rs 50,000, Advance Rs 7,500 (15%)

Baqi raqam = Rs 50,000 - Rs 7,500 = **Rs 42,500**

	12 mahine	6 mahine
Charge	30% = Rs 12,750	15% = Rs 6,375
Total installment	Rs 55,250	Rs 48,875
Mahana qist	Rs 4,600 x 11	Rs 8,150 x 5
Aakhri qist	Rs 4,650	Rs 8,125
Advance samet kul	Rs 62,750	Rs 56,375

Jod ki jaanch (12 mahine): Rs 4,600 x 11 + Rs 4,650 = Rs 55,250.

Schedule ki dates

Start date **17 Oct 2026** ho to: qist 1 = 17 Nov 2026, qist 2 = 17 Dec 2026, qist 3 = 17 Jan 2027, aur isi tarah har mahine us din. Agar start date 31 ho aur agle mahine mein 31 din na hon, to us mahine ka aakhri din lagta hai (jaise 28 ya 30).

Payment ki misal (12 mahine wala plan)

Waqia	Customer ka amount (outstanding)
Plan bana	Rs 55,250
Qist 1 ki poori payment Rs 4,600	Rs 50,650
Qist 2 mein partial Rs 2,000 (qist 2 'Next' rahegi, 'Rs 2,000 paid of Rs 4,600')	Rs 48,650
Qist 2 ka baqi Rs 2,600	Rs 46,050

4. Status kaise tay hota hai

Cheez	Status	Matlab
Qist	Paid	Poori raqam ada ho chuki.
Qist	Next (ya Due)	Pehli unpaid qist. Partial payment ho to bhi yahi rehti hai.
Qist	Overdue	Pehli unpaid qist ki date guzar chuki hai.
Qist	Upcoming	Baad ki qisten.
Plan	Active	Chal raha hai, koi qist late nahi.
Plan	Overdue	Pehli unpaid qist ki date guzar gayi.
Plan	Completed	Saari qisten Paid.
Customer	Overdue / Active / Completed	Plans mein se: koi overdue to Overdue; koi active to Active; warna Completed. Plan na ho to Active (naya customer).

5. Screens kahan hain

Officer / Owner

Screen	Kya hai
Installments (dashboard)	Stats (total customers, remaining, collected this month), search, filter chips (All / Active / Completed / Overdue), customers ki list. Upar: calculator, new customer, sign out. Neeche kheench kar refresh.
New Customer	Naam, phone, CNIC, address. Save karne par database mein.
Installment Calculator	Customer, product, price, advance, plan length, hisaab, start date, schedule preview, Create plan.
Customer Detail	Summary (outstanding, paid, active plans, next due), New Plan button, QR icon, plans ki list.
Plan Detail	Product, status, Total Payable, Advance Paid, Paid, Remaining, progress, Record Payment, poora schedule, contract details (start/end date, markup %, mahana qist).

Customer

Tab	Kya dikhta hai
Home	Avatar aur naam, Remaining Balance card, Next Installment, apni cheez ki tafseel.
Schedule	Plan ki saari qisten, Paid aur Remaining ke cards.
History	Advance aur qiston ki payments, total paid, remaining, next payment.
Invoices	Sirf unke liye jinka branch ke customer se token bhi juda ho. Sirf installment wale customer ko ye tab nahi milta.

Agar customer ke kai plans hon to Schedule aur History par upar chips se plan badal sakte hain.

6. Database (Supabase)

Table	Kya rakhta hai	Khaas columns
installment_customer	Customer	name, phone, cnic, address, **amount** (outstanding, default 0), created_at
installment_plan	Ek product ka plan	customer_id, product_name, price, advance, months, financed, charge_rate (0.025), total_payable, start_date
installment_schedule	Har qist	plan_id, customer_id, number, due_date, amount, paid_amount, paid_at
installment_payment	Har payment	plan_id, schedule_id, kind (advance / installment), amount, paid_at, note, received_by
users	Login profile	role, **installment_id** (customer ko installment_customer.id se jodta hai)

Database functions (RPC)

Function	Kaam
create_installment_plan	Plan + schedule + advance payment likhta hai, customer ka amount barhata hai. Jaanch: advance kam az kam 15%, plan length 6/10/12/18/24, schedule ka jod plan ke total se mel khaye.
record_installment_payment	Qist par payment likhta hai, paid_amount barhata hai, customer ka amount ghatata hai. Raqam qist ke baqi se zyada na ho.
connect_installment_account	QR scan par user ka role customer aur installment_id set karta hai. Email confirm ho, role khali ho, aur customer pehle kisi aur se connect na ho.

Security: customer sirf apna row dekh sakta hai (installment_id se). Officer aur owner sab dekhte hain. Plan, schedule aur payment ki likhai sirf upar ke functions se hoti hai, seedhi table mein nahi.

7. Pehli baar chalane ke liye

- Supabase SQL Editor mein migrations is tarteeb se chalao: **2026_10_17_users_installment_officer.sql**, **2026_10_17_users_auto_profile.sql**, **2026_10_17_connect_customer_account.sql**, phir **2026_10_18_installment_system.sql**.
- Officer ka role set karo: *update public.users set role = 'installment_officer', customer_token = null where lower(email) = 'officer@email.com';*
- Supabase Authentication mein SMTP lagao, warna sign up ki confirmation emails ki limit jaldi poori ho jati hai.
- Google login ke liye Google Cloud aur Supabase mein OAuth setup chahiye (abhi zaroori nahi, email se sign up kaam karta hai).

8. Test karne ka tareeka

1. Officer ke taur par login karo. Sirf Installments tab dikhna chahiye.
2. Naya customer add karo. Dashboard mein dikhe, uska amount Rs 0 ho.
3. Calculator se plan banao (jaise Rs 50,000, advance Rs 7,500, 12 mahine). Customer detail mein 12 qisten dikhein, amount Rs 55,250 ho.

4. Plan Detail mein qist 1 ki payment record karo. Qist 1 Paid ho, amount ghate.
5. Customer detail mein QR icon dabao.
6. Doosre phone/email se naya account sign up karo. 'Visit your nearest branch' screen aaye, wahan Scan QR se officer ka QR scan karo.
7. Customer portal khule: Home, Schedule, History mein wohi plan aur payments dikhein.

9. Abhi ke limits

- Ek payment sirf ek qist par lagti hai. Do qisten ek saath bharni hon to do alag payments likho.
- Plan ya payment ko edit / delete karne ki screen abhi nahi hai (galti ho to database se theek karni hogi).
- Customer ki avatar photo sirf unke liye badal sakti hai jo branch ke customer table se bhi jude hon.
- Installment customer ka naam / phone baad mein badalne ki screen abhi nahi.
- Officer sirf installment ki cheezein dekhta hai; branch ya warehouse ki reports uske liye band hain.

Ye guide app ki maujooda sooratehaal ke mutabiq hai. Naye features (edit, reminders, receipts) aane par isse update kiya ja sakta hai.
